## Professional Summary

Results-driven Mobile Developer with 7+ years of experience designing, building, and publishing cross-platform applications using Flutter (Bloc, Provider) and React Native. Skilled in delivering the full app lifecycle from concept to store deployment (Huawei AppGallery, Google Play), with apps surpassing 5,000+ downloads. Adept at integrating cloud services (Firebase, Supabase, Google Cloud), ads (AdMob, HMS Ads), and payment systems. Experienced in Agile/Scrum collaboration, CI/CD pipelines, testing, and scalable UI/UX solutions. Passionate about building impactful, user-friendly apps that combine performance and great design.

---

---

## Professional Experience

**Freelance Mobile Developer | Remote | Apr 2018 – Present**

- Developed and launched 10+ cross-platform mobile apps (Flutter, React Native) with 5,000+ downloads collectively on Huawei AppGallery and Google Play.
- Built a Firebase-backed Student Management App with real-time sync, reducing administrative workload by 40% for 500+ users.
- Engineered a Biometric Attendance System (Flutter + SQLite) improving accuracy and reducing manual tracking by 60%.
- Integrated AdMob and HMS Ads into entertainment apps (Love Message, Wallblend Wallpaper), generating recurring revenue.

- Collaborated with designers and clients in Agile/Scrum sprints, applying Git version control and CI/CD pipelines.
- Implemented testing strategies (unit + integration tests) to ensure reliability before app store submission.

#### Key Achievements:

- Scaled *Love Message App* to 5,000+ downloads on Huawei AppGallery.
  - Published multiple niche consumer apps (*Tic Tac Toe*, *Wallblend Wallpaper*, *Math Quiz*), each reaching 1,000+ users.
  - Delivered apps with ads & payment integrations that generated consistent income streams.
- 

#### Freelance Website Developer | Remote | 2018 – Aug 2025

- Developed and deployed the official company website & admin dashboard for NARET Company Ltd. ([naret.co.tz](http://naret.co.tz)).
  - Designed a custom CMS (PHP/MySQL) for content and analytics, reducing dependency on external platforms.
  - Optimized the site for SEO and responsiveness, improving organic traffic and engagement.
  - Built an internal CRM & SMS Messaging System with customer segmentation, scheduling, and delivery reports, saving the company 10+ hours per week.
- 

#### Projects

##### Love Message App – Flutter, Firebase, HMS Ads

- Social app featuring shareable love messages & images.
- Achieved 5,000+ downloads on Huawei AppGallery.
- Integrated ads for monetization.
